Mac Spotify Rewind Doesn't Work

I've tried deleting the entire app from my laptop, re-downloading it and re-installing it. EDIT: I updated my Mac to OS X High Sierra (version 10.13.5) Spotify still doesn't work. Device: Macbook Air 11" Mid 2012 I've had Spotify on my laptop for six years, but last week it just didn't want to open anymore. On r/Spotify this week, over a thousand users have gotten behind a post asking for the 'old' Spotify to come back, with a few hundred comments discussing the various problems with the update.
